CAREER SUMMARY

IT Engineer with 1 year of experience in IT operations, upskilling into Agentic AI and Generative AI. Built a production-grade multi-agent AI platform using LangGraph, FastAPI, and React that automates IT operations. Experienced with LLM APIs (OpenAI, Anthropic, Gemini), Retrieval-Augmented Generation (RAG) with vector databases (Qdrant), prompt engineering, and human-in-the-loop AI workflows. Seeking a role as an Agentic AI / Gen AI Engineer where I can apply operations background and AI development skills to build autonomous systems.

WORK EXPERIENCE

IT Engineer | Advika Infotech | Bengaluru | 2025 - 2026

- Managed day-to-day IT operations including system monitoring, incident troubleshooting, and user access management.
- Coordinated with teams to resolve infrastructure issues and maintain system uptime and availability.
- Handled user provisioning and access requests across enterprise systems, following security best practices.
- Gained hands-on exposure to enterprise tools and workflows (ticketing, identity, and monitoring systems) used in IT operations.

PROJECT

Enterprise Agentic AI Platform for IT Operations (AIOps)

Python, FastAPI, React, LangGraph, PostgreSQL, Redis, Qdrant, Docker

- Built a multi-agent AI system with 12-node LangGraph workflow orchestrating 11 AI agents to automate IT operations like password resets and access requests.
- Implemented Retrieval-Augmented Generation (RAG) using Qdrant vector database to ground AI answers in company knowledge base.
- Designed risk-based human-in-the-loop approval workflow; low-risk actions auto-approve, high-risk actions routed to human approvers.
- Added secure authentication with JWT and role-based access control (RBAC); upgraded password hashing from SHA-256 to bcrypt; added error handling across all workflow nodes.
- Wrote 60+ unit tests covering workflow routing, agents, and tools; used pytest for test coverage.

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, SQL

AI / Gen AI: LangGraph, LangChain, LLM APIs (OpenAI, Anthropic, Gemini), RAG, Vector Databases (Qdrant), Prompt Engineering, AI Agents

Frameworks: FastAPI, React, Zustand

Databases: PostgreSQL, Redis

DevOps / Tools: Docker, Kubernetes (basics), Git/GitHub, REST APIs

Testing: pytest, Unit Testing

Others: JWT Auth, RBAC, IT Operations, Incident Management, Access Management

EDUCATION

BE Computer Science | KGISL Institute of Technology | 2019 - 2024 | CGPA: 7.75
